T Th Sat. 7:30 - Noon
(Sat. by appt. only)

To Whom It May Concern:

My name is Dr. Mark A. Werning. I am a Doctor of Chiropractic (D.C.) in the state of South Dakota (current license #574). I graduated from Palmer College of Chiropractic in December of 1978. I've been in continuous active practice since January of 1979. I have resided in Parkston, South Dakota since February of 1980. I am certified in Acupuncture.

I have attended many post-graduate seminars through the years. I am experienced in several different techniques (SOT, Chiro Plus Kinesiology, B.E.S.T., NET, TBM, CRA, and Activator Methods to name a few.) Two years ago I had my first seminar of training in NMT (NeuroModulation Technique). I have returned for two additional training sessions. My use of NMT as taught by the NMT seminars has greatly benefited the patients in my practice. The types of cases that respond to NMT in my practice are patients who suffer from allergies, from the effects of environmental toxins, from autoimmune diseases, from fibromyalgia, from psoriasis, and from irritable bowel disease.

The results follow from the training as taught from the NMT seminar manual and works as disclosed when I use the words from the NMT seminar manual. NMT is a "system" that starts with a foundation of seven pathways, and then the NMT training manual builds on that by introducing more advanced pathways. The pathways contain verbiage that is clear and concise, which allows the body's autonomic nervous system to "reboot" (to borrow a computer term; since the brain works like a computer - only more complicated.) When the correct verbiage is used, the NMT system works as disclosed.

To say that "NMT is useful in treating patients" is an understatement. I have found it to be very useful personally. It also works for my mother, my wife and children. NMT has been a God-sent. NMT, I have found, is useful in every case where the body is less than 100% healthy. My most rewarding case with the use of NMT as taught of Dr. Feinberg helped a woman who was mentally deranged regain her composure. NMT saved her from being institutionalized. She lives with her husband in her own home. When she first came to see me, she was in a "catatonic" state. Now she converses normally and she is able to do her house work.

In closing, I should mention that since the body's autonomic nervous system is quite complicated. I would caution practitioners to only use the words that Dr. Leslie Feinberg has thoroughly tested and is currently presenting in his NMT training manuals and seminars.

Sincerely yours,

Mark A. Werning, DC.
